

Varun Kumar

SOFTWARE DEVELOPER

Billingstad, Norway

☎ (+47) 45312779 | ✉ varun.scandinian@gmail.com | 🏠 scandindian.github.io | 📱 scandindian | 🌐 scandindian

Summary

Software Developer with 7+ years of experience delivering scalable, data-driven web platforms. Combines strong technical leadership with end-to-end product ownership and a proven ability to translate business needs into robust engineering solutions. Experienced in mentoring teams and building complex data pipelines and user-facing systems. Regularly utilizes AI tools such as Anthropic's Claude to enhance productivity, optimize code, and accelerate development workflows.

Education

Indian Institute of Information Technology, Allahabad

BACHELORS AND MASTERS DUAL DEGREE IN INFORMATION TECHNOLOGY

Specialization in Cyber Law and Information Security

Prayagraj, India

July 2014 - August 2019

Work Experience

Xeneta AS

SOFTWARE DEVELOPER

Oslo, Norway

February 2022 - Present

- Owned and led end-to-end delivery of a multi-source data handling pipeline, from requirement gathering with business stakeholders to technical design, execution, and rollout, successfully migrating over 80% of users to the new platform.
- Drove stakeholder communication across product, commercial, and leadership teams, translating business needs into clear technical roadmaps and delivery plans.
- Led sprint planning, daily stand-ups, retrospectives, and backlog refinement, ensuring predictable delivery and team health.
- Mentored junior and mid-level developers, providing technical guidance, code reviews, and career support.
- Interviewed and evaluated software engineers, contributing to hiring decisions and team growth.
- Designed and led frontend architecture for complex data visualisation systems using TypeScript and D3.js, enabling users to explore large-scale ocean freight datasets.
- Initiated and implemented improvements to development workflows, improving code quality, reusability, and team velocity.
- Built a budget forecasting and market analysis tool for enterprise customers, directly supporting commercial decision-making.
- Improved platform authentication architecture by introducing reusable, secure authentication components across applications.

JIG-SAW Inc.

SOFTWARE DEVELOPER

Tokyo, Japan

February 2019 - January 2022

- Built and maintained a web-based IoT device monitoring and management console using React and Python.
- Designed and operated cloud infrastructure on AWS (Lambda, Step Functions, EC2, RDS, DynamoDB, CloudWatch) to support scalable device data processing.
- Led GDPR compliance efforts and strengthened platform security by mitigating XSS vulnerabilities and spam.
- Integrated Salesforce workflows to automate customer inquiries and sales/marketing data management.
- Implemented lightweight encryption mechanisms to secure data transmission from low-resource IoT devices to the cloud.

Industrial Technical Research Institute

R&D INTERN

Hsinchu, Taiwan

May 2018 - July 2018

- Researched the effects of light from virtual reality headsets on the human circadian rhythm.
- Developed an Android app to calculate circadian parameters using a spectral sensor.

Google Summer of Code with FOSSASIA

ANDROID DEVELOPER INTERN

Remote

May 2017 - August 2017

- Increased adoption of FOSSASIA's Open Event standard by implementing it within open-source conference applications.
- Wrote blogs and daily scrum to document the process and enhance technical communication skills.

Gwangju Institute of Science and Technology

RESEARCH INTERN

Gwangju, South Korea

June 2017 - August 2017

- Researched machine learning techniques for artistic style transfer from paintings to images and mixing of multiple styles with the user-defined proportion of selected style.
- Developed an Android app to produce a pastiche using the neural network from user input and presented research work in the poster session.

Skills

Programming Languages	JavaScript, TypeScript, Python, HTML, CSS, C++, SQL
Frameworks & Libraries	ReactJS, Redux, Semantic UI, Tailwind, D3.js, Retool
Cloud & DevOps	AWS, Docker, Netlify, Travis CI, Jenkins
Development Tools & Testing	Git, VS Code, Slack, Jira, Jest, ESLint, Cypress
Development Methodologies	Data Structures and Algorithms, Object-Oriented Programming
AI Tools	Claude (Anthropic), Prompt Engineering, LLM Integration, Generative AI

Languages

English	Native proficiency
Hindi	Native proficiency
Norwegian	Conversational proficiency - A2 Level

Extracurricular Activity

Oslo Rabalder Rugbyklubb	<i>Oslo, Norway</i>
RUGBY PLAYER	<i>July 2023 - Current</i>
- Representing Norway as a part of international gay rugby union. - Recruiting new players, managing social media presence, and raising funds for LGBT organisations.
